

AADITI KULKARNI

Financial Systems Analyst | FinTech Business Analyst | MBA FinTech (BITS Pilani)
+91 8446053520 | aaditiavinashk@gmail.com | Mumbai, Maharashtra | linkedin.com/in/aaditi-kulkarni29

PROFESSIONAL SUMMARY

Finance-technology professional combining 3.5 years of enterprise ERP and financial systems experience with an MBA in FinTech (BITS Pilani, exp. 2027). Demonstrated expertise in payment API integration, transaction reconciliation, backend ledger integrity, and financial data pipelines. Skilled at bridging technology and finance — translating complex business requirements into compliant, data-driven solutions. Seeking a Finance Analyst, FinTech Product Analyst, or Financial Systems Analyst role to apply technical depth and growing financial acumen.

KEY COMPETENCIES

Financial & Strategic Acumen: Financial Statement Analysis (FSA), Corporate Finance & Capital Budgeting (NPV, IRR), Financial Modeling & Valuation (DCF, Multiples), Risk Management & Credit Assessment

FinTech & Ecosystem Domain Expertise: Digital Lending & Alternative Credit Scoring, Open Banking, Payments, and Financial APIs, B2B/B2C Transaction & E-Commerce Workflows, Emerging Tech (Asset Tokenization, Blockchain Frameworks)

Systems & ERP: SAP Commerce Cloud (Hybris), Impex/DataHub, Flexible Search, Financial Workflow Automation

Analytics: SQL, MySQL, PostgreSQL, Python, Data Analysis, Data Visualisation, Advanced Excel & Business Intelligence (Power BI, Tableau), Enterprise Data Modeling & Architecture

Business Analysis: Requirements Gathering, BRD & TDD Documentation, Stakeholder Management, Process Optimisation

Tech Stack: Java, Spring Framework, Microservices, REST APIs, AWS, Docker, Jenkins

Methodologies: Agile / Scrum, ITSM (ServiceNow), GIT, Jira

PROFESSIONAL EXPERIENCE

Financial Systems & ERP Analyst (Analyst II – ERP Package Applications)

DXC Technology | Mumbai, IN

Mar 2023 – Present

- Owned backend ledger integrity verification using Java and Spring Framework — audited transaction data against financial records, identified discrepancies, and ensured platform compliance with financial reporting standards.
- Integrated payment APIs into enterprise e-commerce workflows, enabling secure, end-to-end transaction processing across B2B and B2C channels with zero payment-related production incidents.
- Automated transaction reconciliation pipelines via Impex and DataHub, eliminating manual reconciliation errors and reducing settlement time for financial operations teams.
- Designed data models and Flexible Search queries to support financial reporting and operational analytics, enabling real-time visibility into transaction volumes and revenue streams.
- Acted as requirements analyst between business stakeholders and engineering teams — authored BRDs and TDDs translating financial business rules into implementable technical specifications.
- Deployed AI-driven chatbot using Spring Framework and custom APIs to streamline customer financial queries, reducing manual support overhead across digital commerce channels.
- Led production monitoring and SLA compliance via ServiceNow, maintaining zero escalations across all financial system releases — demonstrating reliability critical in regulated environments.
- Managed cross-functional release coordination for financial feature deployments, applying structured change-management processes aligned with banking-grade operational standards.
